Experience

Nostalgia (Langchain, Supabase, OpenAI, NextJS) | Pune, Maharashtra

Founder and Owner | 10/2024 - Present

- Developing an AI-powered platform for journaling, enabling users to store memories and retrieve them through personalized, story-like responses using retrieval-augmented generation (RAG).
- Building a scalable system with vector embeddings and Supabase, allowing users to store various types of data (e.g., personal, academic) and query context-aware answers efficiently.

Kuesuto (NextJS, NextAuth, Gemini 1.5 flash) | Pune, Maharashtra

Founder and Owner | 08/2024 - Present

- Developed a live AI-powered quiz platform that generates interactive, personalized quizzes based on user input, leveraging the Gemini 1.5 model.
- Built a scalable application allowing users to instantly create quizzes for exam preparation or casual testing across a wide range of subjects.
- Implemented secure user authentication with **NextAuth** and real-time quiz generation, ensuring quick and seamless user experiences.
- Launched on Vercel, providing robust, production-level performance and availability.

YuvaHR (React.js, Node.js, Express.js, Git) | Pune, Maharashtra

Web Developer | 05/2024 - 07/2024

- At **YuvaHR Services**, I worked as a Full Stack Developer where I was responsible for designing and implementing a comprehensive web application using the MERN stack. The project involved creating an intuitive and responsive user interface with **React.js**, along with building robust backend services using **Node.js** and **Express.js**.

Key Contributions:

- Developed a dynamic, user-friendly interface with React.js.
- Integrated a backend to email resumes to the client.
- Implemented file upload with client-side validation.

Skills

Typescript, MERN Stack, NextJS, AI RAG, React, React Native
